- **Implement SQL Operators: Demonstrate the use of different types of operators in SQL with examples, including Arithmetic Operators, Logical Operators, Comparison Operators.**

```
CREATE TABLE Product (
    ProductID INT,
    ProductName VARCHAR(50),
    Price DECIMAL(10,2),
    Quantity INT,
    Discount DECIMAL(10,2)
);

INSERT INTO Product VALUES
(1, 'Laptop', 50000, 2, 5000),
(2, 'Mobile', 20000, 3, 2000),
(3, 'Keyboard', 1500, 5, 100),
(4, 'Mouse', 800, 4, 50);
SELECT * FROM Product;
```

```
1   CREATE TABLE Product (
2       ProductID INT,
3       ProductName VARCHAR(50),
4       Price DECIMAL(10,2),
5       Quantity INT,
6       Discount DECIMAL(10,2)
